

PATIENT NAME: JOHN DOE

ADDRESS: 1600 Pennsylvania Ave NW, Washington, DC 20500

DOB: 03/15/1975

=== Emergency Room Visits ===

Date: 2025-06-03

ER Facility: Pennington-Smith General Hospital

Chief Complaint: Back pain following fall from equipment.

Patient states he slipped off tractor and landed on feet but jolted his back.

Assessment: No signs of acute injury, but advised imaging and rest.

Date: 2025-06-03

ER Facility: Golden-Marsh General Hospital

Chief Complaint: Back pain following fall from equipment.

Patient states he slipped off tractor and landed on feet but jolted his back.

Assessment: No signs of acute injury, but advised imaging and rest.

Date: 2025-06-03

ER Facility: Clark, Ramsey and Jarvis General Hospital

Chief Complaint: Back pain following fall from equipment.

Patient states he slipped off tractor and landed on feet but jolted his back.

Assessment: No signs of acute injury, but advised imaging and rest.

Date: 2025-06-03

ER Facility: Lam-Porter General Hospital

Chief Complaint: Back pain following fall from equipment.

Patient states he slipped off tractor and landed on feet but jolted his back.

Assessment: No signs of acute injury, but advised imaging and rest.

=== Primary Care Physician Notes ===

Date: 2025-03-03

Physician: Dr. Jonathan Vazquez

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2025-01-18

Physician: Dr. Mark Everett

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2025-05-03

Physician: Dr. Shelley McIntosh

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2024-08-11

Physician: Dr. Zachary Simmons

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2025-03-27

Physician: Dr. Candice Sims

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2024-10-25

Physician: Dr. Autumn Villarreal

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2025-04-11

Physician: Dr. Jeffrey Wilson

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2024-12-24

Physician: Dr. Christopher Rojas

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2024-11-28

Physician: Dr. Wesley Lee

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

Date: 2024-06-30

Physician: Dr. Sarah Velasquez

Note: Patient reports chronic lower back pain. Pain is exacerbated by prolonged standing. History of disc degeneration noted in lumbar spine. Recommendation: continue physical therapy.

=== Physical Therapy Sessions ===

Date: 2025-06-03

Therapist: Jessica Thompson

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Brandy Lopez

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Carrie Benitez

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Michael Brown

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Joshua Sanchez

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Michael Lyons

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Robert Cisneros

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Mary Mathews

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Dr. Anthony Wilson

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Matthew Morgan

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Richard Perkins

Patient attended physical therapy session for lower back pain.

Session included stretching, core stabilization exercises, and manual therapy.

Progress: Slight improvement, still limited range of motion.

Date: 2025-06-03

Therapist: Tammy Brown

Patient attended physical therapy session for lower back pain.
Session included stretching, core stabilization exercises, and manual therapy.
Progress: Slight improvement, still limited range of motion.

=== Radiology/Imaging Reports ===

Date: 2024-07-28

Facility: Gonzalez-Yang Radiology

MRI Findings: L4-L5 disc degeneration with mild posterior bulge. No acute fracture. Signs consistent with chronic condition.

Date: 2025-01-07

Facility: Marquez, Pope and Harrison Radiology

MRI Findings: L4-L5 disc degeneration with mild posterior bulge. No acute fracture. Signs consistent with chronic condition.

Date: 2024-12-15

Facility: Williams and Sons Radiology

MRI Findings: L4-L5 disc degeneration with mild posterior bulge. No acute fracture. Signs consistent with chronic condition.
